## EXPERIENCE

### **Itlize Global** — *FullStack Web Developer*

Piscataway, NJ - Jan 2019 - Current

Helped a client in the NYC area build out one of their key web applications that is used to reduce homelessness in NYC using ASP. NET, Angular & SQL Server. Spent most of my time building out the Roles & Permissions of the application.

### **BoardsMD** — *FullStack Web Developer*

Hartford, CT - July 2018 - Dec 2018

Built an entire medical student eLearning website from the ground up using MongoDB, Express.js, Angular and Node.js. This website was deployed using Google Cloud's App Engine & storage.

### **CBS** — *Application Security Analyst (Intern)*

New York, NY - Jun 2015 - July 2016

Performed 30+ dynamic application security & static application security tests using IBM App Scan & Veracode to ensure that websites owned by CBS were safe from security threats and also analyzed these tests to make sure they were correct.

## PROJECTS

### **Laps [Beta]** — *Time Tracker* ([lapsapp.io](https://lapsapp.io))

A desktop app built with Electron.js, Angular, TypeScript & Python that tells you how long you've been spending in applications on your computer.

### **Ignite** — *Habit Tracker* ([github.com/mister-10k/ignite-react-native](https://github.com/mister-10k/ignite-react-native))

A mobile app built with React Native & TypeScript that helps you build habits by allowing you to track what you are doing daily.

## EDUCATION
